

RULES OF THE BOARD APPLYING TO LAND SURVEYORS

ADOPTED FEBRUARY 16, 1967-75

1. Application

All applications for registration shall be made on printed forms LS-1 provided by the Board.

Each applicant must completely execute the application form, being careful to supply all information applicable and requested. It is on the basis of the information supplied on this form that the applicant will be granted a hearing before the Board. Any application not fully and completely executed will be returned to the applicant and will not be considered by the Board until all information has been supplied.

2. Land Surveying Experience Defined

In evaluating the Land Surveying experience the Board shall take into consideration several items, including: time, kind, quality, scope, progression, experience, and the capacity and viewpoint of the applicant. The *time* requirement is prescribed by law. The experience should be the *kind* or kinds normally acquired within the period prescribed by law by young surveyors who would develop into fully competent technical men. *Quality*—the experience should be of such quality as to demonstrate that the applicant has developed the technical skill, sound judgment and initiative in the correct application of land surveying skill. *Scope*—the experience should be of sufficient breadth and scope to assure that the applicant has obtained well-rounded competence in basic land surveying. Highly specialized technical skill in the very narrow and limited branches is not sufficient. *Progression*—the record of progression should indicate successive and continued progress from initial work of simple character to recent work of greater complexity and high degree of responsibility. *Capacity*—the record of experience should indicate that the applicant has attained to a considerable degree those attributes of clear thinking and analysis essential to competence. *Viewpoint*—the record of experience should, when considered with the answers to the examination questions, show that the applicant appreciates economics, community responsibility and ethical practice relating to his work.

The Board will accept as meeting the qualifying experience requirements any combination of the following which totals six or more years, within the limits of the law:

a. Employment in teaching surveying courses in an approved curriculum in a school, technical institute, or college (maximum 5 years credit).

b. Employment or services using the special knowledge and technical skills acquired in the surveying of: (1) areas for the correct determination and description and for conveyance, or for the establishment or re-establishment of land boundaries; (2) and the plotting of lands in subdivisions as such; (3) the making of maps; (4) the plotting of contour layouts; (5) the use of aerial photographs for determining contour and boundaries, etc.; (6) retracement, relocation of corners. In cases where the employment or services of an applicant involve intermittent work of land surveying, then the Board will allow credit in the same proportion that the work of land surveying bears to the whole. In such cases the Board may call for exhibits to bear out the work involved.

c. Completion of a full course in land surveying from International Correspondence School of Scranton, Pennsylvania—maximum four years credit.

d. For each year completed in a technical institute program in such areas as Civil Technology, Surveying Technology, or other study area in

which surveying is included to all extent adjudged to be sufficient by the Board—maximum of four years.

e. Work in a land surveying party will not be construed to be practice of land surveying for other than the person who was charged with the duty of making the decisions in the field and filing the finished work. In establishing proof of practice, the Board reserves the right to go to the site and interview some of the people involved.

3. Transcripts of Education

Transcripts must be transmitted directly to the Board from the educational institution attended. It shall be the responsibility of the applicant to arrange for this transmittal.

4. Examinations and Ratings

Examinations will be held in April and October of each year in Little Rock. Other examinations may be held at such times and places as may be designated by the Board. In judging an applicant's qualifications for registration, the Board will use the following weighted factors:

Education, experience, testimony of references and other reliable sources of information	50%
Written examination	50%

The applicant must receive a minimum grade of 70% in the combined grade as determined above to be eligible for registration. If the applicant receives a grade of less than 60% on the written examination he shall be required to take the examination again. In case the applicant fails to receive the average 70% he may be readmitted to subsequent examinations subject to the following conditions:

Admission to two additional examinations will be made without additional fee. An applicant who fails a third time to pass the examinations will not be readmitted for the same fee. A new application with fees will be required if the applicant desires to again take the examinations. Before the Board will favorably consider a new application of this type it must be convinced that the applicant has progressed in knowledge and experience beyond that evidenced at the time of his latest examination.

Applicants who fail to pass examinations will be notified of the time of the next examination. Each such applicant, if he desires a re-examination, must appear before the Board at the time stated in the notice or must notify the Secretary in writing of a desire for postponement to some future examination period. If applicant fails to respond to two such notifications the application file will be closed and will not be opened without the filing of a new application.

5. Seal

The law stipulates each registered land surveyor shall procure a personal seal.

6. Application and Annual Renewal Fees

The original application for registration must be accompanied by a remittance of Fourteen Dollars (\$14.00).

An application for registration by comity must be accompanied by a remittance of Twenty-three Dollars (\$23.00).

When the applicant for original registration has been notified that he has been approved and has been certified for registration, an additional fee of Nine Dollars (\$9.00) will be required. Upon receipt of this fee a certificate will be issued by the Board authorizing him to practice as a Registered

1976-1979

Board and having passed an eight (8) hour written examination in the fundamentals of engineering, shall be certified or enrolled as an engineer-in-training. A graduate of a non-ECPD accredited engineering program or from an engineering related program may, at the discretion of the Board, be permitted to substitute his formal study for up to two (2) years of the four (4) years of engineering experience.

d. The certification or enrollment of an engineer-in-training shall be valid for a period of ten (10) years.

D. Land Surveyor

1. The evaluation of a land surveyor applicant's qualifications involves a consideration of his education, technical and land surveying experience, exhibits of land surveying projects with which he has been associated, recommendation by reference and a review of these categories during an oral examination.

2. The following shall be considered as minimum evidence satisfactory to the Board that the applicant is qualified for registration as a land surveyor:

a. Original Registration

1. Submit five (5) references with the application, three (3) of which shall be registered land surveyors having personal knowledge of his land surveying experience.

2. A graduate from an approved engineering curriculum with sufficient surveying courses, or any surveying technology curriculum approved by the Board, followed by at least two (2) years of Land Surveying which must be surveying experience of a character satisfactory to the Board, and who shall have passed a sixteen (16) hour written examination designed to show that he is qualified to practice surveying in the State of Arkansas. The teaching of Land Surveying in an approved Engineering or Surveying curriculum may be counted up to one (1) year toward the two (2) years of required field experience.

3. An applicant who cannot qualify under paragraph 2 above and who has six (6) years or more of experience in land surveying of a character satisfactory to the Board, and who shall have passed a written sixteen (16) hour examination designed to show that he is qualified to practice land surveying, may be granted a Certificate of Registration to practice land surveying in this State. Each year of satisfactory work in an approved engineering or engineering technology curriculum majoring in surveying may be considered as one (1) year of experience in land surveying, but may not exceed a total of two (2) years.

4. Completion of a full course in land surveying from International Correspondence School of Scranton, Pennsylvania — maximum four years credit.

b. Registration by Reciprocity

1. A person holding a Certificate of Registration to engage in the practice of land surveying issued to him on the basis of a written examination by proper authority of a State, Territory, possession of the United States, District of Columbia, or any foreign country, based on requirements and qualifications, as shown on his application, which, in the opinion of the Board, is equal to or higher

than the requirements of the Act and these Rules, may be registered at the discretion of the Board. However, he may be asked to take such examinations as the Board deems necessary to determine his qualifications and his knowledge on the Laws, Procedures, and Practices pertaining to land surveying in State of Arkansas.

ARTICLE 9. APPLICATION AND REGISTRATION FEES

A. Application for registration as an engineer, or engineer-in-training or land surveyor shall be on the forms prescribed and furnished by the Board. They shall contain statements made under oath and notarized, showing the applicant's education, detailed summary of his technical experience, and references as set forth, none of which may be members of the Board. The forms and prescribed fee shall be filed with the Secretary-Treasurer. The applicant will be responsible for delivery of the blank reference letters to his references. The application will not be processed until all reference letters, confirmation of engineering degrees and registration have been received by the Secretary-Treasurer. The Board may accept the certified information contained on the copy of a current formal Engineering Examiner's Committee on National Engineering Certification in lieu of the information required on the form prescribed and furnished by the Board. Completed applications for examination must be received at the office of the Secretary-Treasurer by February 15th for the April examination and September 1st for the November examination. An application is not completed until confirmation of degrees, engineering registration and all five (5) references have been received.

B. A recent photograph of the applicant with appropriate attire (men — coat and tie; women — office dress) shall be furnished with the application.

C. Application Fees

Engineer	
Original	\$30.00
Reciprocal	60.00
Engineer-in-Training	10.00
Land Surveyor	
Original	25.00
Reciprocal	35.00

D. Certificate Fee

Engineer	
Original	15.00
Engineer-in-Training	None
Land Surveyor	10.00

E. Reissuance of Certificate

Engineer	10.00
Engineer-in-Training	5.00
Land Surveyor	10.00

1980-May '86

b. An applicant who is not a graduate of an ABET accredited engineering curriculum or does not have a degree must submit three (3) character references on forms furnished with applications.

c. An applicant who is not a graduate of an ABET accredited engineering program must submit four (4) years of progressive engineering experience of a grade and character acceptable to the Board and having passed an eight (8) hour written examination in the fundamentals of engineering, shall be certified or enrolled as an engineer-in-training. A graduate of a non-ABET accredited engineering program or from an engineering related program may, at the discretion of the Board, be permitted to substitute his formal study for up to two (2) years of the four (4) years of engineering experience.

d. The certification or enrollment of an engineer-in-training shall be valid for a period of ten (10) years.

D. Land Surveyor

1. The evaluation of a land surveyor applicant's qualifications involves a consideration of his education, technical and land surveying experience, exhibits of land surveying projects with which he has been associated, recommendation by reference and a review of these categories during an oral examination.

2. The following shall be considered as minimum evidence satisfactory to the Board that the applicant is qualified for registration as a land surveyor:

a. Original Registration

1. Submit five (5) references with the application, three (3) of which shall be registered land surveyors having personal knowledge of his land surveying experience.

2. A graduate from an approved engineering curriculum with sufficient surveying courses, or any surveying technology curriculum of two years or more, approved by the Board, followed by at least two (2) years of land surveying experience of a character satisfactory to the Board, and who shall have passed an eight (8) hour written examination in the fundamentals of surveying, and an eight (8) hour written examination in the principles and practice of land surveying designed to show that he is qualified to practice land surveying in the State of Arkansas. The teaching of land surveying in an approved engineering or surveying curriculum may be counted up to one (1) year toward the two (2) years of required field experience.

3. An applicant who cannot qualify under paragraph 2 above and who has six (6) years or more experience in land surveying of a character satisfactory to the Board, and who shall have passed an eight (8) hour written examination in the fundamentals of surveying, and an eight (8) hour written examination in the principles and practice of land surveying designed to show that he is qualified to practice land surveying in the State of Arkansas, may be granted a Certificate of Registration to practice land surveying in this State. Each year of satisfactory work in an approved engineering or engineering technology curriculum majoring in surveying may be considered as one (1) year experience in land surveying, but may not exceed a total of two (2) years.

4. Completion of a full course in land surveying from International Correspondence School of Scranton, Pennsylvania—maximum four years credit.

b. Registration by Reciprocity

1. A person holding a Certificate of Registration to engage in the practice of land surveying issued to him on the basis of a written examination by proper authority of a State, Territory, possession of the United States, District of Columbia, or any foreign country, based on requirements and qualifications, as shown on his application, which, in the opinion of the Board, is equal to or higher than the requirements of the Act and these Rules, may be registered at the discretion of the Board. However, he may be asked to take such examinations as the Board deems necessary to determine his qualifications and his knowledge of the Laws, Procedures, and Practices pertaining to land surveying in the State of Arkansas.

E. Land Surveyor-in-training

The following shall be considered as minimum evidence of the applicant's qualifications for certification as a land surveyor-in-training:

a. Original Registration

1. A graduate from an approved engineering curriculum with sufficient surveying courses, or any surveying technology curriculum of two years or more, approved by the Board, and has passed an eight (8) hour written examination in the fundamentals of surveying, shall be certified or enrolled as a land surveyor-in-training.

2. An applicant who cannot qualify under paragraph 1. above and who has four (4) years or more of experience in surveying of a character satisfactory to the Board, who has submitted five (5) character references on forms furnished with application, and has passed an eight (8) hour written examination in the fundamentals of surveying shall be certified or enrolled as a land surveyor-in-training. Each year of satisfactory work in an approved engineering or engineering technology curriculum majoring in surveying may be considered as one (1) year experience in surveying, but not exceeding two (2) years.

3. The certification or enrollment of a land surveyor-in-training shall be valid for a period of ten (10) years.

b. Registration by Reciprocity

1. A person holding a Certificate of Registration as a land surveyor-in-training issued to him on the basis of a written examination by proper authority of a state, territory, possession of the United States, District of Columbia, or any foreign country, based on requirements and qualifications, as shown on his application, which, in the opinion of the Board, is equal to or higher than the requirements of the Act and these Rules, may be registered at the discretion of the Board.

June 1986 - March 1990

2. Reciprocal Registration

a. Proof that he is a registered engineer in good standing in another State or Jurisdiction.

b. Must be a graduate of an ABET approved engineering curriculum, have had not less than four (4) years of acceptable engineering experience, and have been registered by a sixteen (16) hour written examination.

c. Submit five (5) references, three (3) of which shall be registered engineers having personal knowledge of the applicant's engineering experience.

d. An applicant with less than the standards outlined in (b) above may be required to obtain additional acceptable engineering experience or be admitted to an eight (8) hour Fundamentals examination, or admitted to an eight (8) hour Principles and Practice examination, or all three requirements. Upon meeting Arkansas minimum requirements, the applicant shall be registered in the State of Arkansas.

D. Land Surveyor-in-training

1. Proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be land surveying (Principles and Practices of Boundary Location), or any surveying technology curriculum of two (2) years or more, approved by the Board, and has passed an eight (8) hour written examination in the Fundamentals of surveying, shall be certified as a land surveyor-in-training.

2. An applicant who cannot qualify under (a) above and who has four (4) years or more experience in surveying of a grade and character satisfactory to the Board, who has submitted three (3) references two (2) of which shall be registered Land Surveyors having personal knowledge of the applicant's surveying experience, shall be admitted to an eight (8) hour written examination in the Fundamentals of Land Surveying. Upon satisfactory completion of the above requirements, the applicant shall be certified as a land surveyor-in-training. The Board in its discretion may grant to any applicant with education work in engineering or land surveying up to two (2) years of experience for his education.

3. The certification of a land surveyor-in-training shall be valid for a period of ten (10) years and after that period the applicant may be required to reapply and retake the Fundamentals examination.

E. Land Surveyor

1. Original Registration.

a. Proof of Graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of Surveying, three (3) hours of which must be Land Surveying (Principles and Practices of Boundary Location), or any surveying technology curriculum of two (2) years or more, approved by the Board, followed by at least two (2) years of land surveying experience of a character which indicates to the Board that the applicant may be competent to practice.

b. An applicant who does not have an approved degree and can show proof of a record of six (6) years or more experience of a character which indicates to the Board that the applicant may be competent to practice. The Board in its discretion may grant an applicant with educational work in engineering or land

surveying up to two (2) years of experience for his education.

c. The teaching of land surveying in an approved engineering or surveying curriculum may be counted up to one (1) year toward the two (2) years of required field experience.

d. Five (5) references, three (3) of which shall be registered land surveyors having personal knowledge of his land surveying experience shall be submitted by all applicants applying for Land Surveying registration.

e. If all these conditions are met the applicant shall be admitted to an eight (8) hour written examination in the Fundamentals of Surveying, and an eight (8) hour written examination in the Principles and Practice of Land Surveying. Upon satisfactory passage of the examinations, the applicant shall be granted a license to practice Land Surveying in the State of Arkansas.

2. Reciprocal Registration

a. Proof that he is a registered land surveyor in another state or jurisdiction.

b. Proof that his education, experience and examination are equal to or greater than that required by the Statutes and The Rules and Regulations of the Board. In addition, the applicant will be required to take a four (4) hour Arkansas land surveying examination to determine his knowledge of Arkansas laws, procedures, and practices.

c. Five (5) references, three (3) of which shall be registered land surveyors having personal knowledge of the applicant's land surveying experience shall be submitted by all applicants applying for reciprocal registration.

d. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.

ARTICLE 9. APPLICATION AND REGISTRATION FEES

A. Application for registration as an engineer, or engineer-in-training, land surveyor, or land surveyor-in-training shall be on the forms furnished by the Board. They shall BE TYPED and all statements in the application shall be made under oath and notarized. The forms and prescribed fees shall be filed with the Secretary-Treasurer. The applicant will be responsible for delivery of the blank reference letters to his references. The application will not be considered complete and processed until all reference letters, confirmation of degrees and licensing have been received at the Board office. The Board may accept the certified information contained in the N.C.E.E. record in lieu of the information required on the forms prescribed by the Board. Completed original applications for licensing by examination must be received at the office of the Board by February 1st for the April examination and August 15th for the October examination.

B. A recent photograph of the applicant shall be furnished with the application.

C. Application Fees

1. Professional Engineer	
Original	35.00
Reciprocal	100.00
Engineer-in-Training	10.00
2. Land Surveyor	
Original	35.00
Reciprocal	100.00

1992-1993

c. Applicant shall submit five (5) references, three (3) of which shall be from registered engineers having personal knowledge of the applicant's engineering experience.

d. Any applicant with less than the standards outlined in (b) above, may be required to obtain additional acceptable engineering experience or be admitted to an eight (8) hour fundamentals examination, or be admitted to an eight (8) hour principles and practice examination, or to meet all three requirements. Upon meeting Arkansas minimum requirements, the applicant shall be registered in the State of Arkansas.

D. Land Surveyor-in-Training

1. An applicant for Surveyor-in-Training who shall supply proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be land surveying (Principles and Practices of Boundary Location), or any surveying technology curriculum of two (2) years or more, approved by the Board, and who has passed an eight (8) hour written examination in the fundamentals of surveying shall be certified as a land surveyor-in-training.

2. An applicant who cannot qualify under (D.1) above and who has four (4) years or more experience in surveying of a grade and character satisfactory to the Board, who has submitted three (3) references, two (2) of which shall be from registered Land Surveyors having personal knowledge of the applicant's surveying experience, shall be admitted to an eight (8) hour written examination in the fundamentals of surveying. Upon satisfactory completion of the above requirements, the applicant shall be certified as a land surveyor-in-training. The Board, in its discretion, may grant to any applicant with education courses in engineering or land surveying up to two (2) years of experience for his education.

3. The certification of a land surveyor-in-training shall be valid for an indefinite period.

E. Land Surveyor

1. Original Registration

a. An applicant shall submit proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be land surveying (Principles and Practices of Boundary Location), or any surveying technology curriculum of two (2) years or more, approved by the Board, followed by at least two (2) years of land surveying experience of a character which indicates to the Board that the applicant may be competent to practice.

b. An applicant who does not have an approved degree and can show proof of a record of six (6) years or more experience of a character which indicates to the Board that the applicant may be competent to practice. The Board in its discretion may grant an applicant with educational courses in engineering or land surveying up to two (2) years of experience for his education.

c. The teaching of land surveying in an approved engineering or surveying curriculum may be counted up to one (1) year toward the two (2) years of required field experience.

d. Five (5) references, three (3) of which shall be from registered land surveyors having personal knowledge of his land surveying experience shall be submitted by all applicants applying for land surveying registration.

e. The applicant shall have a current Land Surveyor-in-Training certificate.

f. When these requirements are met, the applicant shall be admitted to an eight (8) hour written examination in the principles and practice of land surveying.

g. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.

2. Reciprocal Registration

a. An applicant for reciprocal registration must supply proof that applicant is a registered land surveyor in another state or jurisdiction.

b. He must also furnish proof that education, experience and examination are equal to or greater than that required by the Statutes and The Rules of the Board. In addition, the applicant shall be required to take a state specific Arkansas land surveying examination to determine his knowledge of Arkansas laws, procedures and practices.

c. Five (5) references, three (3) of which shall be registered Land Surveyors having personal knowledge of the applicant's land surveying experience, shall be submitted by all applicants applying for reciprocal registration.

d. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.

ARTICLE 9. APPLICATION AND REGISTRATION FEES

A. Application for registration as an engineer or engineer-in-training or a land surveyor or land surveyor-in-training shall be on the forms furnished by the Board. They shall be TYPED and all statements in the application shall be made under oath and notarized. The forms and prescribed fees shall be filed with the Secretary-Treasurer. The applicant will be responsible for delivery of the blank reference letters to his references. The application will not be considered complete and processed until all reference letters and confirmation of degrees and licensing have been received at the Board office. The Board may accept the certified information contained in the NCEES record in lieu of the information required on the forms prescribed by the Board. Completed original applications for licensing by examination must be received at the office of the Board by February 1st for the April examination and August 1st for the October examination. All experience requirements must be satisfied by the date of the application.

B. A recent photograph of the applicant shall be furnished with the application.

C. Application Fees

1. Professional Engineer	
Original	35.00
Reciprocal	100.00
Engineer-in-Training	10.00
2. Land Surveyor	
Original	35.00
Reciprocal	100.00
Land Surveyor-in-Training	10.00

D. Annual Renewal Fees

Engineer	20.00
Engineer-in-Training	5.00
Land Surveyor	15.00
Land Surveyor-in-Training	5.00

1994-1996

be registered in the State of Arkansas.

j. The Board may exempt an individual from the eight (8) hour written NCEES Fundamentals of Engineering Examinations if he/she possesses an EAC of ABET accredited engineering degree and an earned doctorate in engineering from a school which has an accredited engineering degree program in that discipline. An oral interview/examination may replace the written examination. The NCEES Principles and Practice of Engineering examination will not be waived.

2. Reciprocal Registration

a. Applicant for reciprocal registration shall supply proof that the applicant is a registered engineer, in good standing, in another State or Jurisdiction.

b. Applicant must be a graduate of an EAC of ABET or equivalent engineering curriculum, have not less than four (4) years of acceptable engineering experience after graduation and have been registered by a sixteen (16) hour written examination, eight (8) hour Fundamentals of Engineering and eight (8) hours Principles and Practice of Engineering. For those registrants from other jurisdictions who took the Principles and Practice of Engineering examination prior to four years of experience, the Board may waive this requirement providing the acceptable experience at time of application is at least four years. For those individuals with at least fifteen (15) years licensed practice, the NCEES Fundamentals of Engineering examination may be waived.

c. Applicant shall submit five (5) references, three (3) of which shall be from registered engineers having personal knowledge of the applicant's engineering experience.

d. Any applicant with less than the qualifications outlined in (b) above, may be required to obtain additional acceptable engineering experience or be admitted to an eight (8) hour fundamentals examination, or be admitted to an eight (8) hour principles and practice examination, or to meet all three requirements. Upon meeting Arkansas minimum requirements, the applicant shall be registered in the State of Arkansas.

D. Land Surveyor-in-Training

1. An applicant for Land Surveyor-in-Training who shall supply proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be in Principles and Practices of Boundary Location, approved by the Board, and who has passed an eight (8) hour written examination in the fundamentals of surveying shall be certified as a land surveyor-in-training.

2. An applicant who cannot qualify under D.1 above and who has four (4) years or more experience in surveying of a grade and character satisfactory to the Board, who has submitted three (3) references, two (2) of which shall be from registered Land Surveyors having personal knowledge of the applicant's surveying experience, shall be admitted to an eight (8) hour written examination in the fundamentals of surveying. Upon satisfactory completion of the above requirements, the applicants shall be certified as a land surveyor-in-training.

The Board, in its discretion, may grant to any applicant with education courses in engineering or land surveying up to two (2) years of experience for his education.

3. The certification of a land surveyor-in-training shall be valid for an indefinite period.

E. Land Surveyor

1. Original Registration

a. An applicant shall submit proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be in Principles and Practices of Boundary Location, approved by the Board, followed by at least two (2) years of land surveying experience of a character which indicates to the Board that the applicant may be competent to practice.

b. An applicant who does not have an approved degree and can show proof of a record of six (6) years or more experience of a character which indicated to the Board that the applicant may be competent to practice. The Board in its discretion may grant an applicant with educational courses in engineering or land surveying up to two (2) years of experience for his education.

c. The teaching of land surveying in an approved engineering or surveying curriculum may be counted up to one (1) year toward the two (2) years of required field experience.

d. Five (5) references, three (3) of which shall be from registered land surveyors having personal knowledge of his land surveying experience shall be submitted by all applicants applying for land surveying registration.

e. The applicant shall have a current Land Surveyor-in-training certificate.

f. When these requirements are met, the applicant shall be admitted to an eight (8) hour written examination in the Principles and Practice of Land Surveying.

g. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.

2. Reciprocal Registration

a. An applicant for reciprocal registration must supply proof that applicant is a registered land surveyor in another state or jurisdiction.

b. He must also furnish proof that education, experience and examination are equal to or greater than that required by the Statutes and the Rules of the Board. In addition, the applicant shall be required to take a state specific Arkansas land surveying examination to determine his knowledge of Arkansas laws, procedures and practices.

c. Five (5) references, three (3) of which shall be registered Land Surveyors having personal knowledge of the applicant's land surveying experience, shall be submitted by all applicants applying for reciprocal registration.

d. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.

1991-11-16-05

c. Applicant shall submit five (5) references, three (3) of which shall be from registered engineers having personal knowledge of the applicant's engineering experience. Preferably these references should include both present and past supervisors.

d. Upon satisfactory completion of these requirements, the applicant shall be registered in the State of Arkansas.

D. Land Surveyor-in-Training

1. An applicant for Land Surveyor-in-Training who shall supply proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be in Principles of Practice of Boundary Location, approved by the Board, or graduation from an Associate of Science (AS) Degree Program in Land Surveying, approved by the Board, and who has passed an eight (8) hour written examination in the fundamentals of surveying shall be certified as a Land Surveyor-in-Training.

2. An applicant who cannot qualify under D.1 above and who has four (4) years or more experience in surveying of a grade and character satisfactory to the Board, who has submitted three (3) references, two (2) of which shall be from registered Land Surveyors having personal knowledge of the applicant's surveying experience, shall be admitted to an eight (8) hour written examination in the fundamentals of surveying. Upon satisfactory completion of the above requirements, the applicants shall be certified as a land surveyor-in-training. The Board, in its discretion, may grant to any applicant with education courses in engineering or land surveying up to two (2) years of experience for his education.

3. The certification of a land surveyor-in-training shall be valid for an indefinite period.

E. Land Surveyor

1. Original Registration

a. An applicant shall submit proof of graduation from a Bachelor of Science (BS) curriculum with at least nine (9) hours of surveying, three (3) hours of which must be in Principles and Practices of Boundary Location, approved by the Board, or graduation from an Associate of Science (AS) Degree Program in Land Surveying, approved by the Board, followed by at least two (2) years of land surveying experience of a character which indicates to the Board that the applicant may be competent to practice.

b. An applicant who does not have an approved degree and can show proof of a record of six (6) years or more experience of a character which indicated to the Board that the applicant may be competent to practice. The Board in its discretion may grant an applicant with educational courses in engineering or land surveying up to two (2) years of experience for his education.

c. The teaching of land surveying in a approved engineering or surveying curriculum may be counted up to one (1) year toward the two (2) years of required field experience.

d. Five (5) references, three (3) of which shall be from registered land surveyors having personal knowledge of his land surveying experience shall be submitted by all applicants applying for land surveying registration. Preferably these references should include both present and past supervision.

e. The applicant shall have a current Land Surveyor-in-Training certificate.

f. When these requirements are met, the applicant shall be admitted to an eight

(8) hour written examination in the Principles and Practice of Land Surveying.

g. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.

2. Reciprocal Registration

a. An applicant for Reciprocal registration must supply proof that applicant is a registered land surveyor in another State or Jurisdiction.

b. He must also furnish proof that education, experience and examination are equal to or greater than that required by the Statutes and the Rules of the Board. In addition, the applicant shall be required to take a state specific Arkansas land surveying examination to determine his knowledge of Arkansas laws, procedures and practices.

c. Five (5) references, three (3) of which shall be registered land surveyors having personal knowledge of the applicant's land surveying experience, shall be submitted by all applicants applying for reciprocal registration. Preferably these references should include both present and past supervisors.

d. Upon satisfactory completion of these requirements, the applicant shall be granted registration in the State of Arkansas.
